MATHUVANTHI VILLENTHI | ASPIRING DATA SCIENTIST

Hosur|Phone:7538818131|Email:mv020703@gmail.com|LinkedIn:https://www.linkedin.com/in/mathuvanthiv/
Git Hub: https://github.com/MathuvanthiV

PROFILE

Aspiring Data Scientist with strong foundation in Python, R, and SQL, specializing in machine learning, statistical analysis, and data modeling. Experienced in EDA, feature engineering, and building predictive models using Logistic Regression and Random Forest to derive actionable insights from real-world data.

EDUCATION

B.E. CSE, Adhiyamaan College Of Engineering, Hosur – 89% **Oct 2021 – Aug 2025**

WORK EXPERIENCE

EDUTECH | Stem Instructor **Aug 2025 – Feb 2026**

- Trained 20–50 students per batch in Python and robotics, improving understanding of data collection and analytical problem-solving through hands-on projects. Designed and delivered 10+ project-based sessions, mentoring students to build and present data-driven applications using sensor data and logic-based analysis

UNIFIED MENTOR | Web Development Intern **Jun 2024 – Jul 2024**

- Developed a full-stack Clinical Management System managing 100+ patient records, improving data organization, accessibility, and system reliability . Designed and optimized SQL-based relational databases with real-time data updates and validation, enhancing query performance and data accuracy

PROJECTS

EV (Electric Vehicles) Adoption Prediction | Python, Machine Learning | (GitHub: link)

- Built a Logistic Regression model using Python to predict EV adoption, performing data preprocessing and exploratory data analysis (EDA)
- Achieved 75% accuracy and identified key factors such as income, awareness, and cost influencing adoption patterns

Student Performance Prediction | Python, Machine Learning | (GitHub: link)

- Developed and compared multiple machine learning models including Linear Regression, Random Forest, and Gradient Boosting to predict student performance
- Achieved best performance with Random Forest ($R^2 = 0.83$), identifying key factors such as prior grades and attendance influencing outcomes

TECHNICAL SKILLS

Programming: Python, R, SQL | **Libraries:** Pandas, NumPy, Scikit-learn | **Machine Learning:** Regression, Classification, Random Forest| **Visualization:** Tableau, Matplotlib, Seaborn | **Databases:** MySQL, PostgreSQL | **Tools:** Excel, Jupyter, Git, GitHub | **APIs:** REST APIs | **NLP:** BERT | **Statistics:** Hypothesis Testing, Survival Analysis | **Data Analysis:** EDA, Feature Engineering

CERTIFICATIONS & ACTIVITIES

- **Publications:** Co-authored 2 research papers on AI-based applications (IJIRT, IRJMETS)
- **Hackathon:** Smart India Hackathon 2023 – Participant
- **Certification:** Artificial Intelligence| Infosys Foundation & ICT Academy (2025)
- **Leadership:** IIC Coordinator – Coordinated innovation initiatives and student-led projects
